Abstract - Abstract Education underprivileged street children of Bangladesh. Many children in this country live on the streets. It hurts to see these children living on the street. I find it difficult when someone calls their Pedestrian. Why would a child be called a pedestrian? Everyone is human in blood, but why they will be on the road? I started this work with children from March 2016. The start was from gratification.

I. ORGANIZATIONS INTRODUCTION

We do not want a single child to grow up in the streets.
CHAYATAL BANGLADESH is a nonprofit voluntary organization. We want to work for the advancement in the lives of the underprivileged street children of Bangladesh.
We want to do some constructive work upon discussion and help with you. Always guide us and teach us so can overcome our mistakes and remain next to us.
The activities that we are undertaking are as follows:

- For the underprivileged children we have are running 3 schools. The cost (rent, education material, food, uniform, medicine) of all the schools are borne by Chayatal Bangladesh.
- We have primary healthcare to the children and there families for free.
- It is a special project of ours. We collect the food remnants from different community halls. then freeze them to maintain their quality and then the following day we serve the children upon heating the food Children get decent load this way.
- Children are entertained and kept active through various activities like dance, music, games and prize distribution, etc.
- We are about to embark on a few new initiatives. Among then, organism a training on sewing for downtrodden women so that for downtrodden women so that they can learn the tailoring trade and become self reliant.
- It is and importance project of ours. To keep the children away from begging, we are collecting from different offices and household old newspapers and by converting them to packets and thong as and selling them into the market, we distribute back the money/sales proceeds to the children for their fair work effort as a gift to them.
- For all of you sending our respect, love and gratitude.

4. Annual Forestry
5. I will provide scholarships to poor and talented students / students
6. Conscious activities to build a clean society
7. I will save the remaining good food from different institutions and distribute it among the children.

VI. CHANGES HAVE BEEN MADE

Bangladesh is a poor country. Many children in this country live on the streets. It hurts to see these children living on the street. I find it difficult when someone calls their Pedestrian. Why would a child be called a pedestrian? Everyone is human in blood, but why they will be on the road?

My needs are limited. I am satisfied to have a few meals. I think, if I can survive by eating a handful of food, then what is the fault if I give a handful of food to those who cannot eat at once? I'm trying to get everyone involved in good work. The social structures of Bangladesh have failed to give all the children a natural opportunity for growth. The age for admission to employment under different existing laws varies from 14 to 18 years under the new labor law, enacted in 2006. About 13 % of the children of Bangladesh are involved in child labors and they are deprived from education and other child rights. Sometimes the children are involving crimes of carrying arms, drugs and other illegal materials.

The start was from gratification. After a few days I realize that I have a social responsibility. At present, our goal and purpose is to educate and educate these children in self-education. As if all these children were not involved in any kind of misconduct.

Able to put a smile on some children's faces.

VII. CONCLUSION

I mean everyone in the family; I do not separate anyone as a human being.

I want to see Bangladesh more beautiful than before I died. In fact, I want to see beautiful change in the whole world, not just Bangladesh. I want to build a beautiful world by joining everyone on earth.
